

# HIV/LGBTQ Clinical Researcher/Administrator

The Department of Psychiatry at the University of California, San Francisco invites applications for an **HIV and/or LGBTQ Clinical Researcher/Administrator** position at the Zuckerberg San Francisco General Hospital's (ZSFG) community program, the Alliance Health Project (AHP).

AHP is one of seven divisions in the Department and is a pioneering HIV and mental health agency with a broad mission to support the mental health and wellness of the lesbian, gay, bisexual, transgender, queer, and HIV-affected communities in constructing healthy and meaningful lives. Serving the community for 33 years, AHP has received a national achievement award from the American Psychiatric Association for its innovative and groundbreaking work in confronting the AIDS epidemic and supporting the LGBTQ community. Supported by a variety of state and San Francisco health department grants, AHP serves over 5000 clients annually with an annual budget of over \$9M. This position is an important leadership and visionary opportunity for the successful candidate.

The successful candidate will provide administrative and clinical oversight of portions of AHP's clinical services as well as maintain and/or develop a research portfolio in line with the candidate's current area of interest and/or consonant with HIV and/or LGBTQ services research. He/She will also supervise in AHP's graduate traineeship program, be a member of AHP's Executive Committee and help shape the agency's long term services and research vision. Preference will be given to candidates with a history of demonstrated extramurally funded HIV and/or LGBTQ research.

This is a full-time position and will be filled at the Assistant to Full Professor level. Recruitment will be open until filled.

There are opportunities for direct teaching, supervision and support of education innovations in academically oriented clinical and research educational programs for psychology interns, and postdoctoral fellows in a variety of disciplines; as well as opportunities for patient care.

Salary support will be split between clinical and research support. A start up package is available and the successful candidate will be expected to compete successfully for extramural funding to support their research program.
