COMMENCEMENT SPEAKER

Marina Tolou-Shams, PhD

Professor and Deputy Vice Chair for Research

Director, Division of Infant, Child and Adolescent Psychiatry at ZSFG

Dr. Tolou-Shams is a professor and deputy vice chair for research in the UCSF Department of Psychiatry, as well as the director of the Division of Infant, Child and Adolescent Psychiatry at Zuckerberg San Francisco General Hospital and Trauma Center. She also leads the UCSF Juvenile Justice Behavioral Health lab, a research team focused on developing and testing evidence-based mental health, substance use, and HIV risk reduction interventions for community-supervised, justice-involved youth and foster care youth (www.jjbh.org).

Dr. Tolou-Shams received her PhD in clinical psychology in 2004 from the University of Illinois at Chicago and completed her postdoctoral clinical and research training through the Brown University Psychology Training Consortium. She is trained as a pediatric and forensic psychologist and has many years of clinical experience in assessing and treating underserved adolescents and their families. Over the past decade, her roles have included serving as the director of the Rhode Island Family Court Juvenile Mental Health Clinic, director of the Substance Abuse Treatment Service at the Rhode Island Training School, and assistant director of the Rhode Island Hospital Forensic Psychiatry Evaluation Service. She is currently the principal or co-investigator of several National Institute of Health-funded trials aimed toward improving behavioral health outcomes and reducing health disparities for justice-involved youth, including a specific emphasis on trauma-informed, gender-responsive interventions for girls.

Dr. Tolou-Shams and her colleagues are developing and testing digital health interventions that leverage the use of technology—such as SMS texting, apps, family-based telehealth, and social media—to improve access to and engagement in substance use and mental health treatment for system-involved youth and families. She is also the recipient of a National Institute on Drug Abuse mid-career development award that supports her passion for mentoring trainees and faculty, particularly to conduct their own research in the areas of adolescent substance use, mental health, and juvenile justice.
